

We are a digital product and innovation company

We provide enterprise SaaS solutions for the world's largest brands, with a reputation for solving problems that others couldn't. Headquartered in Melbourne and opposite the iconic MCG, We are a cutting edge technology business consisting of 3 teams. Behavioural economics, UX design and technology delivery. We all work in a flexible environment with a totally flat structure and no time sheets. BurnsRED scores 12 on the Joel test for programming.

ABOUT THE ROLE

JUNIOR FULL STACK DEVELOPER

We are looking for a Junior Full Stack Developer to help create innovative digital experiences that solve problems in ways that others couldn't. You will work in a collaborative team across diverse industries using cutting edge tools and technology.

This role is best suited for recent graduates or individuals with limited professional experience in the industry with a drive for learning and professional development.

Some days you will be building new tools from scratch using cutting edge tech. Other days you will be adding features to existing tools or researching how a new technology might change the way we solve future problems.

This role is a hybrid position with a minimum three days in office to ensure you have access and time with our diverse team of UX Designers and Developers to assist in developing your skills and technical knowledge.

Our flavour of software development ensures that you have a high quality functional specification and a full set of UX designs before you are required to write a single line of code.

- You will help define what is possible during the design phase.
- You will work with a world class team of software professionals who are always learning new skills.
- You will be responsible for developing prototypes.
- You will be responsible for solving complex problems.
- Working under Senior Developers, you will be a part of innovative development teams.

REQUIRED SKILLS

- Excellent problem solving skills
- Both efficient team working and autonomous working skills
- Python
- Django Framework and Django Rest Framework
- JavaScript and ReactJS Framework
- Solid understanding of Software Design principles and patterns
- Source control using Git

HIGHLY DESIRABLE SKILLS

- Relational databases and schema design
- Understanding of the AWS Cloud ecosystem and their services
- Experience with JIRA and agile methodologies
- Awareness of Web Security Principles and OWASP Top Ten
- Docker Containerisation
- General networking concepts for web applications

REQUIRED QUALIFICATION

Bachelor of Information Technology or Bachelor of Computer Science (or equivalent).

Level 4, 126 Wellington Parade
East Melbourne VIC 3002

Solving tomorrow's problems for the world's biggest brands
